4_The cost

5_Register in the application

1_Description of the problem:

Difficulty finding photography studios and places that allow photographers to go to shoot their commercial projects, or for personal photography. Also, it is difficult to find new places that allow photography, due to the lack of sufficient promotion for these places.
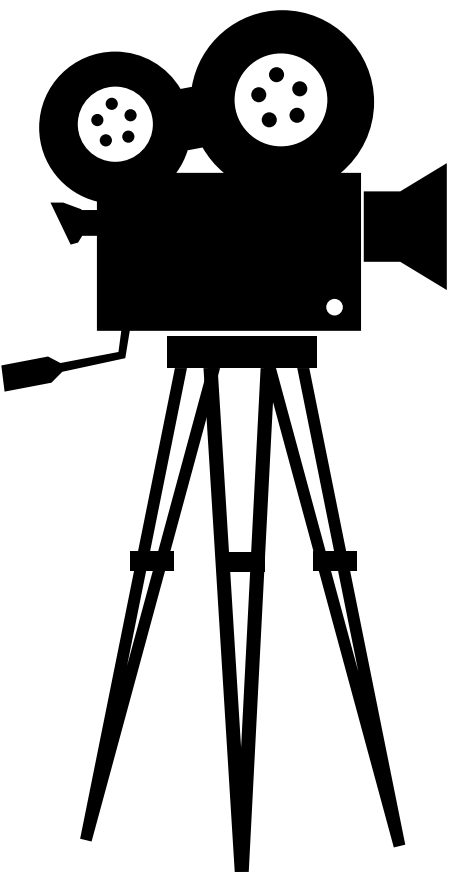

2_The proposed solution:

Creating an application that brings together photography locations that have a photography corner that allows photographers to take pictures in them, photography studios, and photographers, according to the area that the person wants. The application serves all photographers, or non-photographers, who are looking for a photographer or studio to document their memories.

3_Market Size / Scalability:

The size of the market targeting photographers and those interested in this field is large and widespread. After spreading in Oman, we aim to expand outside Oman.
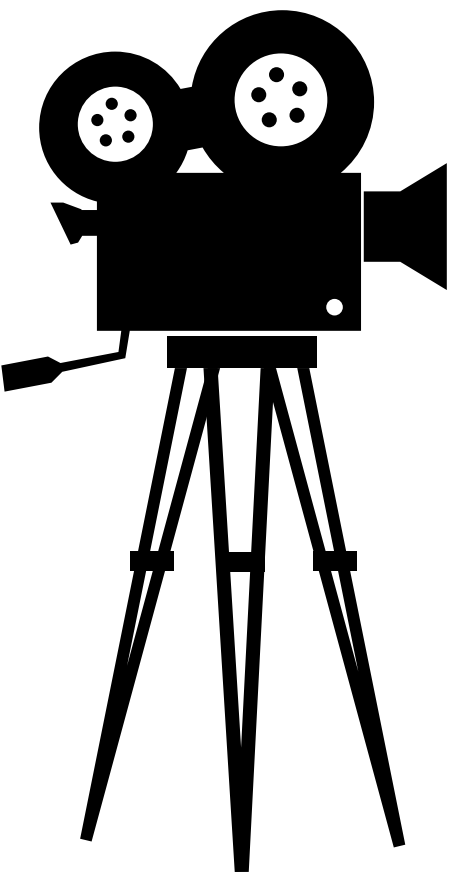

4_the cost:

The cost of creating the application:

The cost will be medium to high

5_Register in the application:

Registering in the application as a

business owner requires paying a

registration fee.

Thank you for watching
